- JavaScript, TypeScript, PHP
- React, Vue.js, Next.js, Material-UI, Tailwind, Tanstack Query
- Laravel, RESTful APIs, Cron Jobs, GraphQL
- SQL, NoSQL (MongoDB, Firebase)
- Git, GitHub, AWS, Netlify, Vercel

EDUCATION

B.Eng. Computer and Communications Engineering
Abubakar Tafawa Balewa University, Bauchi
October, 2024

PROJECTS

MASAAT LONDON E-COMMERCE

PLATFORM is a luxury e-commerce website built with Next.js and Shopify, developed to deliver a refined, high-end digital shopping experience. The platform features a luxurious frontend with smooth animations and a visually elegant UI, reflecting the brand's luxury identity. Communication between the custom Next.js frontend and the Shopify backend is handled via GraphQL using the Shopify Storefront API, enabling seamless product data synchronization and dynamic content rendering.

WORK EXPERIENCE

Fullstack Web Developer

Raven and Macaw

November 2024 – Present

- Leading the development of proprietary web applications using React, Next.js and Laravel, including practice management systems, govtech solutions and e-commerce platforms.
- Designing and maintaining scalable frontend and backend architectures to ensure performance, security, and reliability.
- Managing day-to-day application maintenance, identifying and resolving bugs and performance issues.
- Overseeing the integration of new features, system enhancements, and security upgrades across existing products.
- Collaborating with cross-functional teams to align technical solutions with client requirements and ensuring timely delivery of high-quality software

Frontend Developer

Topify Digital Services Limited

October 2021 – November 2024

- Led the development of user-facing applications and administrative dashboards for airline and bill payment platforms using React and Vue.js
- Built responsive, high-performance interfaces optimized for usability, accessibility, and seamless user experience.
- Collaborated with backend teams to integrate APIs for real-time transactions, ensuring reliability and data consistency.

TOTSLAND SCHOOLS PORTFOLIO is a fullstack web application built with Next.js that enables Totsland Schools to manage event galleries, parents, teachers, classes, and students within a unified platform.

The system includes secure authentication, role-based access control (RBAC), and an administrative dashboard, allowing parents to access and share approved school event galleries while ensuring structured backend management and data security.

FOCAL LEAP TENANT MANAGEMENT

SYSTEM is a web application built with Next.js, designed for real estate firms to efficiently manage tenants and property operations.

The platform features an administrative dashboard and a user-facing portal, enabling tenant management, payment processing through Paystack integration, and streamlined record tracking.

RECON BROTHERS E-COMMERCE is a fullstack e-commerce application built with Next.js and Vendure, designed to deliver a flexible and customizable online shopping experience.

It features a robust frontend paired with a powerful admin dashboard, enabling administrators to manage products, content, and even customize aspects of the user interface with ease.

Writer

Energy Afrique Media Limited

September 2023 – October 2024

- Researched and reported on key developments within the energy sector, producing timely and data-driven news articles.
- Analyzed industry trends, policy changes, and market movements to deliver accurate and insightful coverage.
- Crafted clear, engaging, and informative content tailored to Energy Afrique's professional audience.
- Collaborated with editorial teams to refine story angles, meet publication deadlines, and uphold content quality standards.

IT Support Intern

Professor Iya Abubakar Community Resource Center

November 2018 – February 2019

- Delivered responsive IT support to multiple departments, resolving hardware, software, and network issues to minimize operational downtime.
- Configured and maintained computer systems, ensuring reliable performance and system security across the organization.
- Proactively identified recurring technical issues and implemented practical solutions to enhance workflow continuity.
